- Eco-friendly
- Smart

— Exquisite Life Experience

CUBE-800—Stepping out of the RV, you're greeted by the fresh scent of foliage; when happen upon a lively small town, you pull over to linger, wander and taste authentic treats, and then unwind in your exclusive private space. Take full control of every part of your journey, and immerse yourself in every scenery.

Complete facilities in the caravan, including soft bed and functional kitchen and bathroom areas, not just satisfy all daily needs, but also secretly holds the cozy comfort that elevates a nomadic life into a warm, lively experience, with no compromises.

— Product Design Concept

- The vehicle features a sleek rectangular design, with smoothly rounded corners that sculpt an elegant and aesthetic silhouette. Its metallic finish shimmers with a delicate pearlescent luster under sunlight.
- As night falls, the surrounding LED light strips cast a breathing glow over the steel body - transforming the CUBE-800 into an exquisitely crafted industrial artwork, elegant and agile, no matter where it parks.
- Crafted with premium materials, sophisticated manufacturing techniques, elegant minimalist design, and intricate detailing, the CUBE-800 reflects your refined taste in both appearance and quality.

— Design That Serves For Life

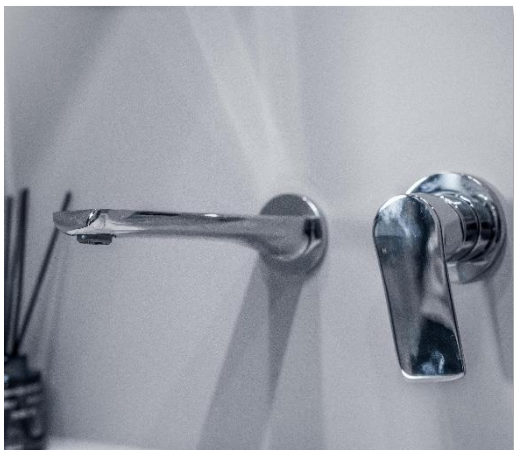

The **CUBE-800** is fully equipped with comprehensive amenities, embodying the “mobile home” concept to its fullest. The living area stands as the centerpiece - boasting a thoughtfully designed, spacious and airy layout that ensures ample room for both relaxation and movement; it is also equipped with modern kitchen facilities and private bathroom, etc.

— Design That Serves For Life

Guided by the core philosophy of “comfort as the foundation, functionality as the essence”, every detail is meticulously crafted to maximize the living experience within limited space. From furniture to appliances, only top-tier materials and reputable brands are selected.

— Breaking the Industry Rules

Aluminum-Steel Hybrid Body

Our aluminum-steel hybrid body is a unique innovation in the caravan industry.

It offers several key advantages: it is safe, stronger, and formaldehyde-free, and achieves a lightweight design while ensuring the safety and durability of passenger vehicles standard.

Incorporates advanced technologies into production process

- Automated Stamping and Welding
- Nuclear Submarine-grade Hot Forming Press (HFP)
- Aerospace-grade Self-Piercing Riveting (SPR)
- Flow Drill Screws (FDS)
- Laser Welding
- Other cutting-edge manufacturing techniques
